Nexcelle is the **pro** for
integrated
propulsion
systems

Nexcelle's state-of-the-art nacelle provides optimized aerodynamics, cost-efficient operation and enhanced maintainability for business aviation's first truly integrated propulsion system – the GE Aviation Passport turbofan engine.

With hardware already proven in flight and production now ramping up, Nexcelle is the nacelle supplier of choice for next-generation aircraft programs.

Nexcelle is a joint venture of GE Aviation's Middle River Aircraft Systems and Safran Nacelles
